

# Saddle—Perfect Fit System

Red line is straightest in picture above so you need a Semi-Quarter Horse Bar saddle.

If Blue line is straighter—a Quarter Horse Bar saddle is required.

If Black line is straighter—a Full Quarter Horse Bar saddle is required.

To use: Place on the base of the withers of horse and press gently until all wooden dowels are touching the horse. Tighten the wing nuts. The top of the tool is now the exact shape of the horse's withers.

Rent for \$40.00 to take home and find the correct saddle fit for your horse. If you purchase a new saddle from Swynar Tack Shop, your rental fee will be waived.
